### SUMMARY

I'm a second-year B.Tech Computer Science student with a strong interest in *full-stack web development* and *software engineering*. I bring hands-on experience in building real-world projects using HTML, CSS, Tailwind, JavaScript, and React (basic), along with backend skills in SQL and MongoDB. I've developed multiple projects including a personal portfolio, a blog website, an AI-based travel planner, and ongoing community and freelancing platforms.

With 25+ certifications in programming and web development, I'm actively expanding my technical skillset and looking for opportunities to apply my knowledge in real-world environments through internships, team projects, or freelance work. I'm passionate about creating clean, user-focused applications and continuously learning new technologies.

### EDUCATION
